# Driving decarbonization and digitalization. Together.

# Working Student: Sensor Software and Test Setup Development (f/m/div)

# Job description

Do you live up to high quality standards and work conscientiously on making things better, faster and more efficient? Do you have experience working in the lab and are highly interested in learning more about silicon MEMS microphones? If you appreciate working in a team and want to learn new things, then this is the perfect job for you! Apply now!

- Focus on the future: Support test development for silicon MEMS microphones
- Reliable work: Build, improve and release Matlab SW of existing and future testsetups
- Being strong together: Support the Design & Product Engineering team with their daily tasks, including running and maintaining our automated lab solutions

#### **Profile**

- Study field: You are currently studying Microelectronics, Microsystems Engineering, Electrical Engineering, or a related subject
- Experience: You have already gained experience with Matlab (or other programming languages) and enjoy writing software
- Skills: You have the ability to analyze and solve problems systematically and have great affinity for technical topics
- Way of working: You work proactively and are a good team player with excellent interpersonal skills
- Personality: Have a pronounced hands on-mentality working closely with and within mechanical workshops (e.g. assembly, drilling)
- Interests: You bring first experience in AI technology and/or machine learning, as a plus
- Language skills: Speak German or English fluently

Please attach the following documents to your application:

- CV in English
- Certificate of enrollment at university
- Latest grades transcript (not older than 6 months)
- High school report

#### Important information:

## At a glance

Contract:

Location: Munich (Germany)
Job ID: HRC0786667
Start date: Jul 01, 2024
Entry level: 0-1 year
Type: Part time

Recruiter

Max-Planck-Str. 5 59581 Warstein Germany

- Working part-time: The focus is on studies. Therefore, working student is
  possible during the lecture period with a maximum of 20 hours per week.
- Proper students (according to the German law) are welcome: You must be
  enrolled, and the examination results or modules of your studies must not have
  been completed yet, so that you can still work in our team for at least 6 months.
  You must also not be in a semester of leave.
- You should live close to the site: It is important for us to work with you on site
  and to integrate you into the team. You should therefore be able to come to the
  site regularly.

#### **Benefits**

• Munich: Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; On-site creche and kindergarden with 220 spots, open until 5:30pm; Holiday child care; On-site social counselling and works doctor; Health promotion programs; On-site gym, jogging paths, beachvolleyball, tennis & soccer court; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement; Performance bonus; Reduced price for public transport and very own S-Bahn station; Access for wheelchairs; Possibility to work remotely from abroad (EU)

#### Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

 Power & Sensor Systems (PSS) drives leading-edge power management, sensing, and data transfer capabilities –

The **PSS division** powers decarbonization and digitalization with a wide range of energy-efficient and digital solutions. PSS semiconductors help avoid carbon emissions, use resources sustainably, manage power effectively and intelligently, give 'things' smart senses, and process data quickly and reliably. The portfolio includes power, connectivity, RF, and sensor system technologies to develop smaller, lighter, smarter, and more efficient solutions for consumer devices, smart home/building applications, robotics, computing and data centers, charging devices, power tools, and much more.

The next generation of silicon and wide-bandgap (SiC and GaN) solutions provides unparalleled performance and reliability for 5G, big data, and renewable energy applications. These materials are paving the way for further energy and carbon savings. Highly precise XENSIV sensor solutions are enabling IoT devices to react intuitively to their surroundings for seamless user interactions while audio amplifiers bring exceptional sound experiences to smart speakers and other audio use cases.

#### We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
