

Driving decarbonization and digitalization. Together.

Specialist Information Technology - Master Data Developer

Job description

In your new role you will:

- Work as the solution developer of planning and product Master Data.
- Design, develop, and maintain Master Data applications using C#, .NET, SQL Server, PL/SQL, and Oracle databases.
- Heavily involved in operation incidents, problem tickets, and change requests.
- Troubleshoot and resolve technical issues, and optimize application performance.
- Develop and maintain technical documentation and knowledge base.
- Stay up-to-date with the latest technologies and industry trends related to product master data management.

Profile

You are best equipped for this task if you have:

- Bachelor's Degree in Computer Science, Information Technology, or a related field.
- At least 1-3 years of experience in developing software applications using C# and PL/SQL.
- Proven experience in software development lifecycle and project management skills.
- Ability to write efficient, scalable, and well-documented code.
- Excellent communication and interpersonal skills.
- Ability to work independently and as part of a team.
- Strong logical thinking, analytical troubleshooting, and problem-solving skills.

Note: 1-year renewable contract under 3rd party payroll partner and entitled to benefits according to the partner company.
