Internship: Software Framework for Component Validation (f/m/div)

Job description

We are looking for students with the willingness to work in a challenging environment within a highly motivated international team. This job is suitable for any student interested to gain some experience in the field of Software Engineering. Apply now for this position in Villach!

Semiconductor solutions of Infineon are becoming more and more smart. This increases the number of tests that needs to be done in order to verify the **functionality** and **performance** in the **lab**.

To be able to reduce the **lab validation effort**, our lab developed a framework. This framework is both developed and used within the lab, meaning you will work very closely together with your end users. We are looking for a student who supports our lab team with the **development of new features** for our **test automation software developed in C#**.

Your tasks would include working in a small scrum team continuing the development of the framework by **adding new equipment, interfacing internal services** and other additional features needed to support the validation in the best way.

Further information

Type of employment: Temporary / Full-time (Flexible working hours from Monday to Friday between 6 a.m. and 7 p.m.)

Duration: min. 6 months

Profile

As our ideal candidate, you offer additionally:

- Studying **Software Engineering, Computer Science** or any technical study with focus on software engineering
- Willingness and experience working with **C#** and **WPF**
- Knowledge in other **programming languages** (like C/C++, JavaScript, Perl, Python, ...)
- Good **English** skills

This position is subject to the collective agreement for workers and employees in the electrical and electronics industry (full-time), employment group B for bachelor students, employment group D for master students (<https://www.feei.at/wp-content/uploads/2023/05/minimum-salaries-white-collar-workers-2024.pdf>).

At a glance

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

The central R&D organization „**Design Enabling and Services**“ (DES) provides the design environments (design-systems) to the different product development teams at Infineon. With leading edge design methods, complex building blocks and a wide range of product development services DES enables Infineon's advanced IC development. This means the complete value creation chain from abstract system models down to the fully verified product layout which ensures high quality manufacturing readiness

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
