

# Driving decarbonization and digitalization. Together.

## Internship: Application Engineering (f/m/div)

### Job description

Are you interested in the semiconductor industry and would like to learn more from our experienced engineers? Infineon Power & Sensor Systems (PSS) delivers future-oriented solutions to provide cutting-edge data transport and to make tools and systems smarter, smaller, lighter and more energy-efficient. This specific internship is suitable for students within a degree program in Electrical & Electronic Engineering, Computer Engineering, Industrial Engineering or similar! If you are a self-motivated person with a proactive working style, you should apply now for this internship in Villach and support our team!

In your new role you will:

- Assist engineers in **system board design** and **verification** of high power density and innovative solutions in DCDC power conversion
- Build **evaluation kits** and perform **system function verification** and **testing**
- Prepare **design documentation**, **application notes** and getting started guides for various solutions developed
- Acquire knowledge and methodology in **system design**, **trouble shooting** and **analysis**
- Analyze **test results** and document the **outcomes**
- Collaborate and contribute to **development projects**

### Further Information

Type of employment: Temporary / Full-time or Part-time (flexible working hours from Monday to Friday between 6 a.m. and 7 p.m.) Duration: min. 9 months

### Profile

You are best equipped for this task if you are a motivated and committed Student from the field of **Electrical & Electronic Engineering**, **Computer Engineering**, **Industrial Engineering** or similar and if you additionally offer:

- Prior experience in **PCB design** and any design software (preferred experience with **Altium designer**)
- Exposure in **system technical / functional analysis**
- **Analytic** and **problem solving** skills
- Proficient in documentation **preparation**
- Plus: **Spice** simulation, **Matlab** experience, **Excel** proficiency and **lab** experience are differentiating skills
- Good communication skills in **English** language are required

### At a glance

Location: **Villach (Austria)**  
Job ID: **HRC0808769**  
Start date: **as soon as possible**  
Entry level: **0-1 year**  
Type: **Full time / Part time**  
Contract: **Temporary**

Apply to this position online by following the URL and entering the Job ID in our job search. Alternatively, you can also scan the QR code with your smartphone:

### Contact

**Sabrina Nindler**  
Recruiter

This position is subject to the collective agreement for workers and employees in the electrical and electronics industry (full-time), employment group B for bachelor students, employment group D for master students (<https://www.feei.at/wp-content/uploads/2023/05/minimum-salaries-white-collar-workers-2024.pdf>).

**Please attach the following documents (German or English) to your application:**

- Motivation letter
- CV
- Certificate of matriculation at a university
- Latest Transcript of records (not older than 6 months)
- Highest completed educational certificate (Matura certificate for Bachelor students, Bachelor certificate for Master students)
- Reference letter (optional)

## Benefits

- **Villach:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; Child care in Villach & Klagenfurt; On-site social counselling and works doctor; Health promotion programs; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement; Performance bonus; Accessibility, access for wheelchairs

## Why Us

**Driving decarbonization and digitalization. Together.**

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

**– Power & Sensor Systems (PSS) drives leading-edge power management, sensing and data transfer capabilities –**

Infineon PSS semiconductors play a vital role in enabling intelligent power management, smart sensitivity as well as fast and reliable data processing in an increasingly digitalized world. Our leading-edge power devices make chargers, adapters, power tools and lighting systems smarter, smaller, lighter and more energy-efficient. Our trusted sensors increase the context sensitivity of “things” and systems such as HMI, and our RF chips power fast and reliable data communication.

**We are on a journey to create the best Infineon for everyone.**

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant’s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
