Internship: Automated Verification Flow Development (f/m/div)

Job description

You are a committed student from the field of Electronics, Software Engineering, Computer Engineering, Electrical Engineering or similar and are looking for a new exciting student job? At Infineon's Design Center Villach (DCV) we connect the real with the digital world. We focus on the development of circuits that process digital and analog signals. Our team in Villach is looking forward to receiving your application!

In your new role you will:

- **Develop/enhance data extraction methods** using python API
- **Support mixed signal team** with automated flow generation
- **Conduct test run** for the automation tool
- **Ensure the automation script** is maintainable and follows a **clear modular structure**
- **Code refactoring** and **documentation**

Further Information

Type of employment: Temporary / Full-time or Part-time (flexible working hours from Monday to Friday between 6 a.m. and 7 p.m.)

Duration: min. 12 months

Profile

You successfully meet the requirements, if you are a motivated and committed student from the field of **Electronics, Software Engineering, Computer Engineering, Electrical Engineering** or similar. You are best equipped for this task if you additionally offer:

- **Problem-solving skills**
- Proficiency in writing **Python** code
- **Data handling**
- Knowledge in **API integration**
- Ability to communicate in **English**

Bonus skills:

At a glance

Location: **Villach (Austria)**
Job ID: **HRC0858605**
Start date: **as soon as possible**
Entry level: **0-1 year**
Type: **Full time / Part time**
Contract: **Temporary**

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

The central R&D organization „**Design Enabling and Services**“ (DES) provides the design environments (design-systems) to the different product development teams at Infineon. With leading edge design methods, complex building blocks and a wide range of product development services DES enables Infineon's advanced IC development. This means the complete value creation chain from abstract system models down to the fully verified product layout which ensures high quality manufacturing readiness.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant 's experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
