

Driving decarbonization and digitalization. Together.

Internship – Production Sustaining & Optimization

Job description

The intern will be engaged in understanding, reviewing, observing, and optimizing the VSM process. Have the opportunity to work closely with the TMSP team for process improvement and participate in decision-making processes, share ideas, and provide recommendations.

In your new role you will:

- Review and **analyze the current VSM processes**
- **Implement optimization strategies** to enhance the efficiency of the VSM process
- **Work collaboratively with cross-functional teams** to ensure seamless process improvements
- **Present findings and recommendations** to the team and mentor in a clear and concise manner

Internship learning outcomes:

- Gain experience in identifying and implementing process improvements
- Develop skills in working within a team
- Enhance your decision-making abilities
- Learn from experienced TMSP mentors

Profile

You are best equipped for this task if you have:

- Currently taking **Bachelor's degree in Industrial Engineering** or any related disciplines
- Good verbal and written communication skills
- Experience with MS- Excel

Why Us

#WeAreIn for driving decarbonization and digitalization.

As a global leader in semiconductor solutions in power systems and IoT, Infineon enables game-changing solutions for green and efficient energy, clean and safe mobility, as well as smart and secure IoT. Together, we drive innovation and customer success, while caring for our people and empowering them to reach ambitious goals. Be a part of making life easier, safer and greener.
