

Driving decarbonization and digitalization. Together.

Senior Analyst Information Technology

Job description

Do you like translating customer needs into IT solutions? Do you want to support Infineon in implementing the latest SAP technology (e.g. SAP S/4Hana)? Within the oneSAP project at Infineon, the master data model is being harmonized and extended to all Infineon production sites and production partners. In this context, we are looking for a solution designer for SAP master data, especially material master data and documents of our products.

In your new role you will:

- Be a key contact person between master data consumer representatives and master data solution development, integration, and governance teams
- Work on the solution design of material master data and document management (SAP DMS) in an international team from Europe, Asia and North America
- Support the development of IT solutions by understanding business needs and translating them into functional design proposals (i.e. solution architecture)
- Ensure compliance requirements and the fit to architecture standards by considering the bigger picture
- Manage the implementation with our solution providers as well as contribute to the go-live, cutover, and operations support
- Share your knowledge and best practices with others project team members

Profile

You are best equipped for this task if you have:

- A degree in Business Informatics, Informatics, Computer Science or similar
- At least 3-5 years of professional experience in the SAP environment within the IT department or as a consultant
- Experience in master data management, preferably in SAP
- Experience with SAP Material Management (MM) or SAP Document Management System (DMS) is an advantage
- A holistic understanding of requirements and the ability to convert them into functional and technical designs (i.e. solution architecture)
- SQL knowledge is a plus as part of our master data databases are Oracle SQL databases
- Advanced intercultural skills to collaborate in an international environment
- Strong communication and analytical skills
- Very good English language skills
