

Driving decarbonization and digitalization. Together.

Staff Quality Engineer (f/m/div)*

Job description

Do you consider yourself to be critical thinker, who strives for excellence? Are you detailed orientated with good communication skills? Then we have a new challenge at our global company that could be perfect for you. Join our Quality Management team in Cegléd as a Staff Quality Engineer.

As a Staff Quality Engineer, you will be responsible to organize, coordinate and accomplish internal and external audits, conduct management reviews, contribute towards the success of Zero Defect activities, ensure high quality standards are achieved and sustained in the quality management system, as well as support continuous process efficiency improvement.

In your new role you will:

- Be responsible to organize, coordinate and **accomplish internal and external audits according to standards of IATF16949 and VDA6.3 and conduct management reviews;**
- **Hold internal trainings** on standards with which the company shall comply;
- **Act as internal auditor - Plan and execute audits** according to the audit program, to **document the result of audits, to monitor the timely and effective implementation of corrective and preventive actions;**
- **Provide continuous improvement of the quality management system** according to the business process framework and the standard requirements.

Profile

You understand the importance of problem-solving and clear documentation. You are detail-orientated and use your strong organizational skills and responsibility to contribute efficiently to meet the required quality standards.

You are best equipped for this task if you have:

- **A University Degree or College Degree in Quality Engineering** or a related engineering field is required;
- **Solid understanding of IATF16949 and VDA6.3 standards** - certification would be an advantage;
- **Experience** in the **manufacturing** environment in a Quality Management role such as Internal/External Audit, Change Management;
- Relevant **experience of Quality Management Core Tools;**
- Good **negotiation skills** and advanced **communication skills;**
- **Fluency in Hungarian** and **good command of English.**

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

Backend

The **backend segments** enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly and testing.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
