

Driving decarbonization and digitalization. Together.

Project Manager for Power Device Technology Development (f/m/div)

Job description

You want to cooperate with renowned players in the automotive industry? You would love to manage big projects internationally and dive deeply into technical topics? Then we have just the right position for you! As Project Manager for Power Device Technology Development you will develop ideas to their full implementation in close collaboration with the customer! Come and join us as to work on the leading edge of the promising E-Mobility movement and take the technology development of our power devices to the next level!

The role as **Project Manager for Power Device Technology Development (f/m/div)** will request from you **project management skills** as well as **technical skills**, not even mentioning outstanding communication skills and a certain level of flexibility

In your new role you will:

- **Plan, control and execute technology development projects** for SiC-MOSFET, Si-IGBT and diode chip technologies across various Infineon sites
- Conduct a **forward-looking risk management** in order to proactively **identify (technical) challenges as well as (business) opportunities**
- **Take on full project manager responsibilities** by continuously assessing the progress and adjusting the project plan . This includes the overall project planning, development target alignments, resources, budget as well as **professional risk management**
- **Form, guide and motivate cross-functional project teams** - you create energy and commitment by explaining and keeping a **good team spirit**
- **Identify stakeholders** (internal and external) **and develop relationships** with internal stakeholders, being aware of their interest for the project
- Apply **solid functional knowledge/technical expertise** in **more than one functional area**

This position is part of the **Project Management Career Path**. It provides an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members. You want to learn more about the role as a Project Manager? Check out our profile story!

Recruiter

effectiveness, quality, cost-efficiency, risk-prevention and continuous improvement. As a role model for open communication and feedback, you know how to favorably align with various people internationally. Moreover, you are personally committed to the customer's concerns and award them a high priority. Your structured working style helps you to follow the department's big picture and contribute to the projects' success even in more complex situations.

You are best equipped for this task if you have:

- **A degree in Physics or Electrical Engineering, a PhD is beneficial**
- **More than 5 years of experience within the semiconductor industry**, preferably in the area of technology development or transfer management
- At least **4 years experience in leading projects**, preferably within an industrial development department
- **A stable technical understanding of power device physics, technology development and semiconductor processing**
- **Convincing communication and presentation skills** to work successfully with internal and external stakeholders
- Project management **certification** (e.g. **IPMA C**) (as an advantage)
- **Excellent English skills, German** would be an advantage

We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry, employment group H (<https://www.feei.at/wp-content/uploads/2023/05/minimum-salaries-white-collar-workers-2024.pdf>). The monthly salary is paid 14 times p.a. We offer a higher compensation depending on your expertise and skills.

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

– Automotive (ATV) shapes the future of mobility with micro-electronics enabling clean, safe and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. **Infineon ATV** is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
