

# Driving decarbonization and digitalization. Together.

## Senior Data Engineer (f/m/div)

### Job description

Do you enjoy both working technically and enabling others with Data? In this role, you will enable our customers to maximize the value generated by data within a global, company-wide Business Intelligence and Analytics organization. We are fully committed to this organization's strategic impact and we are looking for you to leave your footprint and to work with us on templates that shape Infineon's future. Join us now as a Senior Data Engineer!

As a Senior Data Engineer, you will be responsible for business intelligence solutions that are built based on our well-defined tool stack and state-of-the-art methodology. Your tasks cover requirement analysis, development and deployment of new as well as maintenance and operations of existing reporting solutions. Close collaboration with business departments, other IT teams and external partners is key to contribute to the efficient processing and analysis of valuable business information.

In your new role you will:

- Take **ownership of global reporting solutions**
- Define and align **reporting requirements** with the global user community (requirement engineering)
- Develop and maintain **data ingestion pipelines** from various source systems
- **Collaborate** with business departments and IT colleagues
- Implement **reporting solutions** and coordinate **external service providers**
- Plan and execute **release, test and rollout** while ensuring **high data quality**
- Be part of **IT business intelligence projects**

### Profile

You are committed to fulfill our customers' need for data, reports and dashboards to support business decisions. You are constantly striving to make our business intelligence solutions better, faster and more efficient. To achieve this, you team up with others, contribute with your skills and qualities and welcome diversity. Additionally, your communication skills and supportive attitude are your best allies in the achievement of excellence.

You are best equipped for this task if you have:

- A **degree in Information Technology, Computer Science, Business Administration**, or a comparable field of study
- **1-3 years of work experience as a Data Engineer** in the area of **Business Intelligence & Analytics**

## Why Us

**Driving decarbonization and digitalization. Together.**

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

**– Feel welcome at Infineon Shared Service Center in Porto! –**

Our multifunctional business model is focused on high quality services through operational excellence with engaged people. We are recognized globally at Infineon as a valuable business partner.

These are the main business services on our site: Finance, Procurement, Human Resources, Cyber Security, Robotic Process Automation, IT, Audit, Legal, Compliance, Business Continuity among other areas that consolidate us as a high-quality partner. You will find a very open and approachable working culture at Infineon Porto, focused on promoting our people engagement and well-being at work.

**We are on a journey to create the best Infineon for everyone.**

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
