

# Driving decarbonization and digitalization. Together.

## Internship: Product Management Power System Integrated Circuits (f/m/div)

### Job description

As a global semiconductor leader in power systems and IoT, we enable game-changing solutions for green and efficient energy, clean and safe mobility, as well as smart and secure IoT. That's why you probably use our products every day: chargers, telecom base stations, servers, AI servers, solar, refrigerators, aircons and factory automation. We are looking forward to your application!

- **Teamwork is dreamwork:** You support the team in various day-to-day tasks and analyses across our broad product portfolio
- **Take responsibility:** You manage, maintain and adjust our digital web presence and information available as "self service"
- **Organizational talent:** You follow up on outstanding designs and opportunities
- **Reliable work:** You manage and monitor our retailers
- **Identify needs:** You conduct price analyses and make recommendations and you also investigate and find cross-selling opportunities
- **Keep the overview:** You track our revenue ramp up of newly introduced products

### Profile

- **Study field:** You are currently studying electrical engineering, mechanical engineering, business administration with technical minor or similar
- **Personality:** You are a fast learner and a motivated team player
- **Way of working:** You can work in an independent way
- **Language skills:** You have good English skills, both written and spoken. German is a plus

### Benefits

- **Munich:**

### **Driving decarbonization and digitalization. Together.**

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

#### **– Power & Sensor Systems (PSS) drives leading-edge power management, sensing, and data transfer capabilities –**

The **PSS division** powers decarbonization and digitalization with a wide range of energy-efficient and digital solutions. PSS semiconductors help avoid carbon emissions, use resources sustainably, manage power effectively and intelligently, give ‘things’ smart senses, and process data quickly and reliably. The portfolio includes power, connectivity, RF, and sensor system technologies to develop smaller, lighter, smarter, and more efficient solutions for consumer devices, smart home/building applications, robotics, computing and data centers, charging devices, power tools, and much more.

The next generation of silicon and wide-bandgap (SiC and GaN) solutions provides unparalleled performance and reliability for 5G, big data, and renewable energy applications. These materials are paving the way for further energy and carbon savings. Highly precise XENSIV sensor solutions are enabling IoT devices to react intuitively to their surroundings for seamless user interactions while audio amplifiers bring exceptional sound experiences to smart speakers and other audio use cases.

#### **We are on a journey to create the best Infineon for everyone.**

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
