

Driving decarbonization and digitalization. Together.

Senior Project Leader Embedded Systems (f/m/div)

Job description

You are excited about tackling diverse customer projects and overcoming complex technical challenges? To strengthen our project management and support our strategic growth, we are looking for you as an experienced Senior Project Leader for this newly created position as soon as possible. The PJM Career is meant to provide an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will:

- Hold **project responsibility** from kick-off to lessons learned along the V-model
- **Identify innovations from the projects** and recognize technical trends as well as develop ideas for Hitex products
- **Optimize our development process** and promote of standardization in the company
- **Monitor the technical implementation** within the defined quality and deadline specifications
- **Support the sales department** in project acquisition (clarification of technical details, cost estimation)
- **Report** directly to the **head of engineering**

Profile

You know how to lead as well as motivate a team and see customer satisfaction as your top priority. Furthermore, you appreciate diverse tasks with a lot of creative freedom, which you use for the benefit of the customer and the company.

You are best equipped for this task if you have:

- Proven experience in **managing embedded systems /embedded software projects**
- Profound knowledge of a **functional safety standard** (e.g. ISO 26262, IEC 61508 or similar)
- Experience in the **application and maintenance of a quality management system**
- **Excellent German and English skills**, written and spoken

Why Us

The **Hitex GmbH** operates independently as a subsidiary of Infineon Technologies AG and is a leading supplier of products and solutions for the successful development and
