

Driving decarbonization and digitalization. Together.

Manager Procurement Facilities Management

Job description

In your new role you will:

- Pooling of demand from various sites to increase purchasing power to best possible effect.
- Operations Plan (Blue Book) with yearly goals and estimated market price development to inform Infineon Management and sites about planned strategy and main areas of activities.
- **Supplier management:** The Commodity Manager is the communication provider (spokesperson) to the most important suppliers and specifically focus on global sourcing, selection, evaluation and the development (out-phasing) to acquire the most promising and best suppliers and to guarantee an optimum on purchased quality and supply chain.
- Co-ordinate a cross-functional “Focus on Value” team (products or services).
- **Contract management:** Negotiation of global contracts and agreements to include a common sense of understanding into contracts to have a clear, understandable and cost effective regulation among the entire Infineon community and to guarantee certainty of supply with the best terms.
- Intensive, regular contact with internal/external interface partners to especially built up and maintain a communicative purchasing network recognize developments (in market, demand, etc.) and to influence accordingly.
- **Reporting of results:** Comprehensive reporting of cost reduction / avoidance is executed monthly to inform all sites and the Purchasing Heads about the valid details per plant /segment in order to make the results transparent and to control the activities of the CM on a result-oriented basis and against the Operations Plan.
- **Risk reporting:** In case of severe problems (catastrophes or others) extended information is lined out; risks are quarterly reported according to the rules of Infineon Corp. Risk Management.
- **Relationship management:** Professionally manage supplier relationship with most important suppliers to ensure suppliers management attention and participation on both sides to continuously enhance collaboration.
- **Project support:** Actively support local projects (e.g. new plants or modules) to take the pooling power also into projects and to use project demand to establish better terms for normal demand.

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant's experience and skills.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
