

Driving decarbonization and digitalization. Together.

Working Student: ADA (f/m/div)

Job description

As a global semiconductor leader in power systems and IoT, we enable game-changing solutions for green and efficient energy, clean and safe mobility, as well as smart and secure IoT. That's why you probably use our products every day: smartphone, charger, electric toothbrush, coffee machine, refrigerator, remote control and much more. We are looking forward to your application!

- **Take responsibility:** You will develop a foundation model that can be easily customized and fine-tuned for various vision tasks using Infineon's dataset
- **Data is everything:** You work on a model which should be capable of accommodating images of different sizes and spatial resolutions, effectively utilizing the spectral information, and outperforming existing models for downstream tasks
- **Expand your horizons:** You will deal with Infineon's unique dataset, which differs significantly from standard image datasets
- **Identify needs:** You optimize the model to effectively utilize spectral information, potentially drawing inspiration from models like DINOv2, Mask Auto Encoder (MAE), IJEPa
- **Experience research:** You investigate multi-stage pretraining techniques to improve model performance
- **Reliable work:** You validate the model's performance through ablation studies and comparison with existing foundation models

Profile

- **Study field:** You are currently studying Data Science, Electrical Engineering, Informatics or a related subject
- **Experience:** You are familiar with foundation models, such as Segment Anything and Masked Auto Encoder (MAE). IJEPa, DIN
- **Personality:** You have excellent communication and presentation skills as well as strong problem-solving and analytical skills
- **Skills:** You are proficient in programming languages, such as Python, deep learning frameworks, such as TensorFlow or PyTorch and in Bash scripting, Linux terminal knowledge to streamline data processing; model training would be advantageous
- **Language skills:** You have good English skills, both written and spoken

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of

semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

- Infineon Technologies in Warstein is our innovation and lead site for the research and development of power semiconductor modules with future-oriented jobs related to the energy transition -

Infineon Warstein is a world-leading innovation and lead site for the research, development and production of power semiconductor modules for a greener future and is regarded as a driver of research and development within our global group. Here you will find inspiration and potential for the concepts of tomorrow through our products for wind turbines, photovoltaics, rail vehicles, the automotive sector and industrial drives.

In Warstein, we work together with more than 2,200 people from over 40 nations on international and innovative projects for more energy efficiency and a green future worldwide.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
