

Driving decarbonization and digitalization. Together.

Working student: Technical Marketing Low-Medium Power (f/m/div)

Job description

Are you familiar with power semiconductors? Do you have a high affinity for electrotechnical topics and enjoy supporting innovative new developments for future solutions in the field of renewable energies? Test, simulate and support the definition for the new generation of our power semiconductors and make an important contribution to our product definition team at the Warstein site. With your support, we can continue to meet our customers' requirements for our products. Apply now! We look forward to hearing from you!

- **Experience research:** Planning and carrying out simulations and measurements on power semiconductor modules
- **Broaden your horizons:** Familiarize yourself with applications (e.g. renewable energies), their requirements and derive the requirements for the power semiconductors
- **Shape the future:** Support in defining the properties of tomorrow's power semiconductor modules
- **Data is everything:** Elaboration, summarization and presentation of technical topics
- **Recognize needs:** General support in product definition engineering

Profile

- **Study field:** You are currently studying electrical engineering, mechatronics or a related degree programme
- **Experience:** Ideally, you have already gained some practical experience in the field of electrical engineering
- **Working style:** You are characterised by your reliable, independent and focused way of working
- **Personality:** You have a high sense of responsibility and strong communication skills
- **Language skills:** You have a solid command of English

Please attach the following documents to your application:

- CV in English
- Certificate of enrollment at university
- Latest grades transcript (not older than 6 months)

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
