

Driving decarbonization and digitalization. Together.

Senior Director Engineering (f/m/div)

Job description

In this role, you will be at the forefront of innovation, leading the development and enhancement of our diverse range of products that drive sustainability and decarbonization. You will also optimize processes, oversee the performance and results of multiple related units, and shape the future of our engineering capabilities.

As the **Head of Engineering**, you will be the driving force behind our company's innovation and success, responsible for:

- Developing and implementing engineering strategies and processes to meet customer expectations for **product development**
- Aligning business objectives and operational needs in terms of cost, quality, and delivery reliability
- **Providing vision**, inspiration, motivation, and **coaching to the engineering team**, fostering a culture of excellence
- **Driving the development** of best-in-class products and technologies, while overseeing the performance and results of multiple related units within the organization
- Establishing and driving key performance indicators to ensure the successful implementation of defined strategies and processes
- **Translating business requirements and objectives into technical solutions**, enabling the company to succeed and effectively compete in the market.
- Drive synchronization between different sites and segments, ensuring alignment and collaboration across the organization

Profile

As a **visionary leader**, you thrive on driving innovation and excellence. Your **passion for technology and innovation** enables you to **bridge business needs with technical solutions**, always striving for exceptional outcomes. With an unwavering **commitment to excellence**, you inspire others with your proactive approach and ability to generate value through creative ideas and solutions. You are a collaborative leader who embodies excellence, serving as a role model for your team.

You are best equipped for this task if you have:

- University or College **degree in technical field** (Mechanical Engineering, Electrical Engineering, Scientific Engineering)
- min 10-year-experience in **electronical production**,
- min 5-year- **managerial experience**,
- Proven **project management** skills

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant's experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
