## Working Student: Product Management for MEMS-Microphones (f/m/div)

### Job description

Do you have a passion for analyzing, managing, and driving business figures in an extremely dynamic market environment? Then you've come to the right place! To strengthen our product management and marketing team, we are looking for a curious and entrepreneurial team player. As a working student, you will support us in evaluating competitors, application-specific customer requirements and trends. If you want to become a part of Infineon and help us make life easier, safer and greener, then apply! We are looking forward to your application!

As a working student in our team, you will support us with the following tasks, among others:

- **Take responsibility:** You conduct competitive analyses on the market for MEMS microphones
- **Keep up to date:** You analyze applications for MEMS microphones with regard to customer requirements, market size and trends
- **Inform your colleagues:** You create the monthly newsletter on market trends and product launches of consumer electronics like smartphones & TWS
- **Keep the overview:** You support the planning and monitoring of medium and long-term projected revenues
- **Promote the product:** you help in preparing marketing materials for customers and internal stakeholders

### Profile

- **Study field:** You are currently studying Industrial Engineering, Economics, Electrical Engineering or similar
- **Experience:** You ideally have already gained first experience in the field of product marketing and product management
- **Way of working:** You are characterized by your high level of self-motivation, independent working style and analytical skills
- **Personality:** You have a strategic and entrepreneurial mindset and are confident in using MS Office, Tableau and Confluence
- **Language skills:** You have fluent English skills, German is a plus

### Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

#### – Power & Sensor Systems (PSS) drives leading-edge power management, sensing, and data transfer capabilities –

The **PSS division** powers decarbonization and digitalization with a wide range of energy-efficient and digital solutions. PSS semiconductors help avoid carbon emissions, use resources sustainably, manage power effectively and intelligently, give ‘things’ smart senses, and process data quickly and reliably. The portfolio includes power, connectivity, RF, and sensor system technologies to develop smaller, lighter, smarter, and more efficient solutions for consumer devices, smart home/building applications, robotics, computing and data centers, charging devices, power tools, and much more.

The next generation of silicon and wide-bandgap (SiC and GaN) solutions provides unparalleled performance and reliability for 5G, big data, and renewable energy applications. These materials are paving the way for further energy and carbon savings. Highly precise XENSIV sensor solutions are enabling IoT devices to react intuitively to their surroundings for seamless user interactions while audio amplifiers bring exceptional sound experiences to smart speakers and other audio use cases.

**We are on a journey to create the best Infineon for everyone.**

This means we embrace diversity and inclusion and welcome everyone for who they

are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant 's experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
