

Driving decarbonization and digitalization. Together.

Working Student: Digitalization, Data Analysis and Data Governance (w/m/div)

Job description

We are more than 58,600 employees worldwide at 86 locations. As a working student in the Data Management and Governance team, you will play a pivotal role in understanding and visualizing business requirements by collecting, processing and performing statistical analyses on large datasets to discover useful information, suggest conclusions and support decision-making. If you want to become a part of Infineon and help us make life easier, safer and greener, then apply! We are looking forward to your application!

- **Shape the future:** You understand and analyze business requirements through a digital lens to drive efficient solutions
- **Holistic overview:** You identify opportunities for process enhancements
- **Data is everything:** You employ statistical techniques to scrutinize data and produce actionable business insights
- **Keep up to date:** You convey insights through both reports and visual presentations
- **Reliable work:** You develop data dashboards, charts, and visual aids to support decision-making within the organization
- **Stakeholder management:** You engage with stakeholders from various departments to specify data requirements for analysis projects tailored to their unique business processes

Profile

- **Study field:** You are currently studying Data Engineering and Analytics, Information Management, Statistics or similar
- **Background:** You have a background in compiling, structuring, and analyzing large data sets with attention to detail and accuracy
- **Skills:** You possess a strong foundation in MS Office suite. Basic knowledge of data analysis languages such as R, Python would be a plus
- **Experience:** You already have experience in utilizing data visualization and reporting tools such as Tableau, Power BI or equivalent, to communicate impactful insights effectively
- **Language skills:** You have excellent English skills, both written and spoken

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

The central R&D organization "**Design Enabling and Services**" (DES) provides the design environments (design-systems) to the different product development teams at Infineon. With leading edge design methods, complex building blocks and a wide range of product development services DES enables Infineon's advanced IC development. This means the complete value creation chain from abstract system models down to the fully verified product layout which ensures high quality manufacturing readiness.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant's experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
