

Driving decarbonization and digitalization. Together.

Working Student: Product Marketing Wireless Infrastructure (f/m/div)

Job description

Are you an open-minded and communicative person with a strong interest in technology and business? Do you want to gain practical experience and learn how to bring technical products to the market? Then we have the perfect challenge for you: This student job gives you the opportunity to get deep insight into our Product Marketing team for 5G Wireless Infrastructure. Does this sound interesting? Then apply and help making life easier, safer, and greener with us!

- **Expand your horizon:** You will drive product marketing activities for Radio Frequency (RF) components globally
- **Focus on the future:** You will support day to day product management tasks for RF devices, e.g. develop product comparisons or manage product sample requests
- **Inform your colleagues:** You will inform our global teams about the latest products and be in charge of the marketing file repository
- **Identify needs:** You will identify, collect, and analyze latest market information on 5G
- **Be creative:** You will develop and update marketing material e. g. in PowerPoint

Profile

- **Study field:** You are currently studying Electrical Engineering, Industrial Engineering, Mathematics or Information Technology or similar
- **Skills :** You like to engage and communicate with people and are an open-minded person, able to express your views in a structured, concise way
- **Way of working :** You ideally already gained first work experience in product management for microchips or RF components or in researching and assessing markets in consulting, venture capital or industry
- **Language skills:** You have very good English skills, both written and spoken

Please attach the following documents to your application:

- CV in English
- Certificate of enrollment at university
- Latest grades transcript (not older than 6 months)
- High school report

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

– Power & Sensor Systems (PSS) drives leading-edge power management, sensing, and data transfer capabilities –

The **PSS division** powers decarbonization and digitalization with a wide range of energy-efficient and digital solutions. PSS semiconductors help avoid carbon emissions, use resources sustainably, manage power effectively and intelligently, give ‘things’ smart senses, and process data quickly and reliably. The portfolio includes power, connectivity, RF, and sensor system technologies to develop smaller, lighter, smarter, and more efficient solutions for consumer devices, smart home/building applications, robotics, computing and data centers, charging devices, power tools, and much more.

The next generation of silicon and wide-bandgap (SiC and GaN) solutions provides unparalleled performance and reliability for 5G, big data, and renewable energy applications. These materials are paving the way for further energy and carbon savings. Highly precise XENSIV sensor solutions are enabling IoT devices to react intuitively to their surroundings for seamless user interactions while audio amplifiers bring exceptional sound experiences to smart speakers and other audio use cases.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
