Driving decarbonization and digitalization. Together.

(Senior) Manager External Wafer Manufacturing Operations (f/m/div)*

Job description

Join our team as a key player in driving operational excellence! In this role, you'll lead the charge in monitoring and improving performance metrics, resolving customer returns, and implementing corrective actions to ensure seamless production. If you're a problem-solver with a passion for process improvement, we want to hear from you!

In your new role you will:

- oversee operational performance monitoring, including key metrics such as yield, cycle time, line stability, CLIP, and delivery performance, and driving implementation of improvements
- manage customer returns, fab excursion tasks, and coordinating with other departments to ensure timely case closure
- owning the implementation and verification of operational deviation correction actions, utilizing problem-solving techniques such as 8D, 5 Whys, and Is-Is not
- forecast and confirm capacity reservations with foundries to meet business requirements
- coordinate and support new tape-out activities for Business Units

Profile

You are best equipped for this task if you have:

- a solid educational foundation in Electronics, Physics, Engineering, or a similar field
- a strong industry background, with several years of experience in the semiconductor industry, particularly in production and technology development
- the ability to make clear conclusions and present them in management summaries
- a keen sense of risk assessment, enabling you to evaluate and make decisions while balancing benefits and risks, and recommending feasible proposals
- high-level communication skills, allowing you to effectively interact with internal stakeholders and external customers
- experience in process integration, process modules, product engineering, or related fab experience, with IC design experience being a plus
- a proven track record of working in a multi-cultural environment, with fluency in business conversation and presentation skills

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
