

Driving decarbonization and digitalization. Together.

Project Manager Technology Development

Job description

In your new role you will:

- Plan, control and execute technology development projects for SiC-MOSFET, Si-IGBT and diode chip technologies across various Infineon sites
- You take on full project manager responsibilities by continuously assessing the progress and adjusting the project plan. This includes the overall project planning, development target alignments, resources, budget as well as professional risk management
- Form, guide and motivate cross-functional project teams - you create energy and commitment by explaining and keeping a good team spirit
- Identify stakeholders (internal and external) and develop relationships with internal stakeholders, being aware of their interest for the project
- Applies solid functional knowledge/technical expertise in more than one functional area
- This role will request from you PJM skills as well as technical skills, not even mentioning outstanding communication skills and a certain level of flexibility

Profile

You are best equipped for this task if you have:

- A degree in Physics or Electrical Engineering, a PhD is beneficial
- More than 5 years of experience within the semiconductor industry, preferably in the area of technology development or transfer management
- At least 2 years experience in leading projects, preferably within an industrial development department
- A solid technical understanding of power device physics, technology development and semiconductor processing
- Convincing communication and presentation skills to work successfully with internal and external stakeholders
- Excellent English skills, German as a plus

Benefits

- **Kulim:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Holiday child care; Medical coverage;

Why Us

#WeAreIn for driving decarbonization and digitalization.

As a global leader in semiconductor solutions in power systems and IoT, Infineon enables game-changing solutions for green and efficient energy, clean and safe mobility, as well as smart and secure IoT. Together, we drive innovation and customer success, while caring for our people and empowering them to reach ambitious goals. Be a part of making life easier, safer and greener.

Are you in?

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant's experience and skills.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
