

# Driving decarbonization and digitalization. Together.

## Senior Engineer Final Test Technology

### Job description

As a key player in our team, you'll be responsible for developing and enabling test technology manufacturing capabilities for our Semiconductor Back-End Final Testing on Digital Mixed Signal and Memory Solutions portfolio.

In your new role you will:

- Develop and implement package-level electrical testing using the latest Automated Test Equipment, best-in-class Test Handling & Contact designs.
- Conduct package quality inspections using state-of-the-art mark, scan, and vision equipment.
- Qualify and release new Test Manufacturing solutions (including equipment, hardware, software, and materials) from project inception to full production release.
- Troubleshoot production manufacturing and operation issues related to test equipment and test hardware using systematic methodologies and tools.
- Drive the implementation of test solutions to improve Overall Equipment Efficiency (OEE).
- Lead and manage innovation, productivity, and quality improvement initiatives to drive continuous growth and excellence.

### Profile

You are best equipped for this task if you have:

- Bachelor's or Master Degree in Mechanical / Mechatronics / Electronics / Material Science or any related fields
- Multiple years of experience in a Semiconductor Final Test Manufacturing environment
- Experience in handling Final Test and Memory solution platform equipment and related hardware's in Semiconductor environment
- Posses good communication skills with a flair of making good technical presentation
- Pro-active attitude with ability to handle multiple projects assigned in a fast pace environment
- Systematic & process oriented in a fast and agile working environment
- Work effectively with a global & multi-cultural teams, with a good influencing skills to achieve best-in class solutions
