

# Driving decarbonization and digitalization. Together.

## Manager / Senior Manager - External Wafer Manufacturing Operations

### Job description

Join our team as a key player in driving operational excellence.

In your new role you will:

- **Forecast and confirm capacity reservations** at assigned foundries to meet business requirements.
- **Oversee operational performance monitoring** such as yield, cycle time, line stability, CLIP, delivery performance etc. and driving improvement measure implementation.
- Responsible for **implementing and validating correction for operation deviation**.
- **Lead the PCRb** (process change review board) for process changes.
- **Manage customer returns or fab excursion task** and coordinate with other departments to **ensure timely case resolution**.
- Coordinate and **support new tape-out activities** for business units.

### Profile

You are best equipped for this task if you have:

- Min. **Master / bachelor's degree** in Physics, Material Science, Electrical Engineering or equivalents.
- Min. **5 – 8 years of related working experience in the semiconductor industry** in areas of process integration, module, wafer sorting, product and customer service engineering or other related fab experience.
- Prior experience in IC design would be a plus.
- A strong team player with **experience in multicultural work environment**.
- High level of English proficiency for presenting and communicating with internal and external stakeholders.
- **A keen sense of risk assessment to evaluate and make decisions** while balancing benefits and risks and recommending feasible proposal.
- **Effectively translate** senior management's **directives into a detailed plan** and ensuring their implementation accordingly.
