## Senior Project Manager Technology Development for E-mobility (f/m/div)

### Job description

As Senior Project Manager you will be responsible for complex projects that focus on Si and SiC technology development for E-mobility. You will lead a multi-site and multi-national team to best performance. If this sounds interesting to you, then come and join our highly motivated team and be part of the success story of E-mobility. The PJM Career is meant to provide an attractive career opportunity for employees, who focus on managing projects and functional leadership of project team members.

In your new role you will:

- **Plan, control and execute development projects** for **SiC-MOSFET, Si-IGBT and diode chip technologies** across various Infineon sites
- **Keep the overview and manage technical interdependencies**
- Conduct a **forward-looking risk management** in order to proactively identify (technical) challenges as well as (business) opportunities
- Take on **full project responsibilities** by continuously assessing the progress and adjusting the project plan
- **Look at the bigger picture**, with business in mind, by **actively managing internal and external key stakeholders** in an **international environment**
- **Form, guide and motivate cross-functional project teams** - you create energy and commitment by explaining and keeping a **good team spirit**

This position is suitable in full-time and part-time.

Austria: We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry, employment group I. <https://www.feei.at/wp-content/uploads/2022/05/minimum-salaries-white-collar-workers-2023.pdf> The monthly salary is paid 14 times p.a. We offer a higher compensation depending on your expertise and skills.

### Profile

You are able to quickly grasp new technical information, quickly establish a successful cooperation, recognize and use different areas of expertise and skills of the team members. You commit yourself to the results of your own team, you create energy and commitment by connecting team members. You set yourself ambitious goals, remain aware of the big picture even in complex situations and take decisions despite

## Why Us

**Driving decarbonization and digitalization. Together.**

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications

to customer-specific solutions together with the appropriate software.

**– Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –**

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon **ATV** is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
