

Driving decarbonization and digitalization. Together.

Principal Engineer I4.0 & Automation

Job description

We are seeking an experienced Principal Engineer who is a skilled Full Stack Developer and experienced in manufacturing automation to join our team. You will be responsible for designing, developing, and deploying scalable, efficient, and reliable web applications. You will work on both front-end and back-end development related to manufacturing automation and smart factory.

In your new role you will:

- Design, develop, test, and deploy web applications using a range of programming languages, including but not limited to JavaScript, HTML/CSS, Python, Ruby, or PHP
- Work on both front-end and back-end development, including UI/UX design, API integration, and database management
- Collaborate with cross-functional teams, including automation development, factory operations, factory IT, etc to ensure successful project delivery
- Participate in code reviews and contribute to the improvement of the overall code quality
- Troubleshoot and debug issues, identifying and implementing solutions to improve application performance and scalability
- Stay up-to-date with industry trends, best practices, and emerging technologies, applying this knowledge to improve our web applications
- Develop and maintain technical documentation, ensuring that all code is properly documented and easily maintainable
- Work in an Agile environment, participating in daily stand-ups, sprint planning, and retrospectives
- Knowledge and experiences in data governance practices
- Manage complete software life cycle from designing, development, testing, deployment & maintenance
- Effectively analyze problems, harmonize requirements and provide proposals
- Design architecture for systems and databases

Profile

You are best equipped for this task if you have:

- Bachelor's degree in Computer Science, Information Technology, or a related field
- At least 5+ years of experience in full stack development, with a strong portfolio of projects showcasing your skills

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
