- Accountable to interface with design, process, test, reliability and manufacturing engineering to solve product issues and production issues in terms of yield, stability and quality.
- Responsible to develop and sustains process improvements to reduce production costs and increase yields.

Profile

You are best equipped for this task if you have:

- Bachelor's degree in Electrical Engineering / Physics / Statistical Analysis or any equivalent course.
- Minimum 5 years of related working experience in product engineering.
- The ability to work with multinational team and independently to achieve the targets.

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant's experience and skills.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
