

Driving decarbonization and digitalization. Together.

Specialist Storage

Job description

You advance your tasks with commitment, passion and proactivity. You always have an overview, even in complex situations, and you are used to making responsible decisions even under difficult circumstances. At the same time, your communication skills will help you to work profitably in a team and with internal partners across departments and countries.

In your new role you will:

- End-to-end administrate and be responsible for our storage infrastructure
- Plan, design, build and implement various storage solutions, up to cross-functional and pre-defined user acceptance tests
- Support our internal customers as well as application owners and our net work and backup colleagues with complex problems (1st, 2nd and 3rd level support) including performance analyzing and debugging
- Do daily operational tasks such as the resolution of Remedy Tickets and Changes
- Follow-up/track alarms sent out by Zabbix and other self-developed alarming tools
- Proactively solve system generated error messages and alarms of Storage vendor proprietary monitoring tools
- Support tech-refreshes and system-extension
- Keep existing documentation and tools up-to-date and document and share changes, new tools and solutions as appropriate (CMDB, Zabbix, Confluence, Bitbucket, GitLab, Rundeck, ...)
- Participate in global Storage service On-Call shifts

Profile

You are best equipped for this task if you have:

- Completed a degree in Computer Science or similar professional career path
- At least 3 years of relevant professional experience as a storage administrator, systems engineer or consultant
- Been working with NetApp, Dell EMC, PURE or Hitachi storage solutions for several years (as an advantage)
- Well-proven expertise in scripting (Bash and/or PowerShell and/or Python; Perl5 or Ansible is a BIG plus...)
- Knowledge in ITIL, CMDB and other Enterprise IT processes and frameworks

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
