

# Driving decarbonization and digitalization. Together.

## Engineer IT Linux

### Job description

Responsible for installing, configuring, and maintaining Linux/Unix infrastructure across global data centers while ensuring resilience and high availability. Additionally, accountable for the lifecycle of servers, providing support for deployment and migration projects, technical troubleshooting, continuous improvement, and follow-the-sun support within a global team.

In your new role you will:

- Install, configure, and maintain Linux/Unix infrastructure (Red Hat, Centos, Ubuntu, Solaris, HPUX) across global data centers
- Ensuring resilience and high availability through Enterprise Clusters (Service Guard) and load balancers.
- Accountable for overseeing the entire lifecycle of Linux/Unix servers, including deployment, configuration, tuning, patching & hardening, monitoring, troubleshooting and disposing of servers.
- Assisting clients in deployment and migration projects through consultancy and knowledge sharing.
- Provide level 2 and level 3 technical support, collaborating with other data center engineers to address complex technical issues.
- Required to strive for continuous improvement in the operating environment while actively seeking opportunities to implement automation.
- Collaborate within a global team to provide follow-the-sun support, ensuring a stable environment for critical services.
- Work with the following tools: Linux, HPUX, Solaris, Service Guard, Ansible, Rundeck, Foreman, Puppet, Zabbix, Confluence and Kibana.

### Profile

You are best equipped for this task if you have:

- Bachelor's degree in Computer Science or related fields, with a preference for candidates holding certifications such as Red Hat Certified System Administrator (RHCSA) or similar Linux/Unix Administrator certifications.
- Relevant experience in overseeing Enterprise IT Infrastructures, particularly with Linux Servers.
- Strong analytical and problem-solving skills
- **Proficiency in English** and desirable soft skills including teamwork, project management experience, presentation/communication abilities, and an independent and structured approach to work.

## Why Us

### **Driving decarbonization and digitalization. Together.**

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

### **We are on a journey to create the best Infineon for everyone.**

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant's experience and skills.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
