

# Driving decarbonization and digitalization. Together.

## Warehouse Process Expert (f/m/div)

### Job description

Are you a seasoned professional with a passion for Logistics or Supply Chain? Are you seeking an opportunity to integrate your proactive mindset with your exceptional communication skills? If so, seize the opportunity to become a Warehouse Process Expert at our Shared Service Center in Porto, and become an integral part of our collaborative global team.

As a Warehouse Process Expert in manufacturing logistics, you will be primarily dedicated to harmonizing and standardizing operations across all sites and clusters. This will involve leveraging the complete spectrum of capabilities in terms of business process management and S/4HANA process expertise.

In your new role, you will:

- **Manage** relevant Logistics warehouse communities worldwide as **Orchestrator in terms of general alignments (of needs, concepts and general governance) while being the 1<sup>st</sup> level support for Key Users.**
- **Drive process enhancements** while fostering harmonization and standardization for global manufacturing warehouse processes in **sync with process owners and key users**
- Coordinate and consolidate input from the sites and clusters, assess those requests in a global context to **seize impact in overall process, benefit and effort** if implemented.
- **Guide** and support IT or any other solution provider during the solution design phase.
- **Coordinate testing activities / execute user acceptance tests** in collaboration with key users and IT.
- **Drive/manage and support projects in context of** manufacturing warehouse processes, structure the work and **take decisions that will benefit the global logistics community** despite uncertain circumstances and drive the community accordingly.
- **Act as change agent** for global material warehouse process improvements, facilitate global best practice sharing within the warehouse process panels and promote harmonization and standardized processes.
- **Monitor process stability and related KPI and follow up with process owner and sites to analyze factors that impact the KPIS and possible corrective actions**
- **Manage process documentation and apply necessary trainings of users and related functions in terms of manufacturing warehouse processes**
