

Driving decarbonization and digitalization. Together.

Senior Staff Specialist IT - Jama IT Functional Owner

Job description

In your new role you will:

- Work in a dedicated global IT and BIZ team with a mission to transform product requirements and verification methodologies into more digitalized, unified and global requirements driven development and test management flows
- Collaborate with global business owners/key stakeholders to gather, assess and consolidate user requirements, transform the requirements into IT functional design and IT solution proposals
- IT application ownership and functional & business consulting for applications (e.g. Jama) within the Requirements, Verification & Test engineering domain.
- Driving technical / operations activities of Application scalability, stability and performance engineering
- Support the definition of business roadmap for requirements engineering.

Profile

You are best equipped for this task if you have:

- Minimum of 7+ years of working experience in IT or related working environment
- Minimum of 4 years of experience working as a Business Analyst preferably in R&D Requirements Engineering and Verification Traceability, preferably with knowledge of semiconductor product development processes (V-model).
- Experience with Jama or any related requirements engineering tool is a plus
- Excellent coordination and leadership skills required to manage internal and external stakeholders
- Excellent interpersonal, communication, and presentation skills
- Experience with service operations, and good understanding of ITIL Framework & Processes
- A good understanding of the system architecture of web applications and containerized applications (e.g. Docker or OpenShift platform), database technologies (e.g. MSSQL) as well as coding experience (e.g. Java, JavaScript, Python, C#)
- Practical experience in working with Agile Methodologies & Agile Teams (Scrum, Kanban), experience with Atlassian tool suite like (Jira, Confluence) would be a plus

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant's experience and skills.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
