

Driving decarbonization and digitalization. Together.

Engineer Industrial Engineering

Job description

This job involves conducting time studies, optimizing processes, driving continuous improvement, utilizing technical skills, and collaborating with cross-functional teams for process enhancements. Fresh graduates are encouraged to apply.

In your new role you will:

- **Conducting Time Studies:** Planning, conducting, and analyzing time studies to establish standard times for various tasks and processes within the industrial setting.
- **Process Optimization:** Analyzing production processes and identifying opportunities to improve efficiency, reduce waste, and increase productivity.
- **Continuous Improvement:** Driving continuous improvement initiatives through the implementation of lean manufacturing principles and other methodologies.
- **Technical Skills:** Proficiency in statistical analysis, process simulation, and industrial engineering software tools.
- **Communication:** Collaborating with cross-functional teams, including production, engineering, and management, to communicate and implement process improvements.

Profile

You are best equipped for this task if you have:

- Bachelor's degree in industrial engineering or a related field is typically required.
- 0-3 years experience in Industrial Engineering or related field.
- Good command of English speaking and listening.
- Able to work under high pressure.
- Fresh graduates are encouraged to apply.

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.
