Foundry Operation Manager

Job description

Manage Silicon Foundry related operations for Infineon products at Silicon Foundry including new tape out support and ramp-up of new products to ensure on-time delivery with stable high yield and quality.

In your new role you will:

1. Manage Silicon Foundry related operations for Infineon products at Silicon Foundry including new tapeout support and ramp-up of new products to ensure on-time delivery with stable high yield and quality.
2. Manage cross-functional team to improve and control the manufacturing of Infineon products at Silicon Foundry.
Achieve operation team targets in yield, delivery performance and quality (incl. new product ramp-up) *
Manage team with partners and keep all necessary partners informed (internally and externally)
Make or drive proactively decisions needed for daily operations
Manage actions to handle/prevent excursions
Reporting and controlling of daily operations
Ensure process execution and implementation of initiated actions
Monitor initiated actions and define corrective measures
3. Support and maintain the partnership together with KAM/SRC
Establish and maintain relationship with partners (e.g. fab management)
Keeping management and related parties informed about operation status and topics
4. Quality management, drive foundry to achieve highest quality standard and ensure zero-defect executed for production. Drive to prevent FAR and MRB.

Profile

You are best equipped for this task if you have:

1. Master of Science in Physics, Material Science, Electrical Engineering or related engineering degree
2. Experience in Fab process integration, product engineering, wafer sorting and customer service engineering. IC design experience will be a plus. 6+ years work experience is required.
3. Technologies transfers and ramp experience is preferred but not a must
4. Leadership & Team Player.
5. Proactive attitude for new challenges and problem solving
6. Multicultural experience.
7. English fluency is a must.

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant's experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
