

Driving decarbonization and digitalization. Together.

Senior Project Manager Package Development - HRC0899778

Job description

As a Senior Project Manager, you take over a leading role to initiate, plan, lead and coordinate development projects. These products are ideally suited for automotive, industrial, and consumer applications such as for EVs, battery protection, battery charging, load switches, DC-DC converters, level shifters, low voltage drives, and many more. This position is part of Infineon's Project Management Career Path ensuring you acquire the right skill set according to internal norms, through trainings and coaching.

In your new role you will:

- Plans, organizes, and controls the project/ sub-projects with moderate complexity (up to Project classification class C), risk, impact and reach
 - a. Manages a diverse project team with sub-projects with a moderate span of GGs
 - b. Manages and controls the entire project life-cycle and ensures hand-over to sustaining function
 - c. Organizes the activities and resources needed for the project to ensure timely release of each milestone
- Fully responsible for all operational decisions in the project and for the successful achievement of all project targets (time, quality, cost and budget)
- Key communication interface (for project related matters), representing Back End to other Infineon Divisions (e.g. Business lines, Central Functions e.g. Finance, PTI, FE Fabs, etc)
- Forms and leads the project team and assigns responsibilities within project to Project Managers of sub-projects and Project Members
- Uses IFX project management tools to structure projects, control progress and for reporting and documentation
- Drives problem solving activities within the project using standard IFX trouble shooting methodologies, eg 8D, 5 Whys, etc
- Actively identifies and manages changes and adapts project approach accordingly while ensuring buy-in for change
- Support Development Head & Development Excellence Head in defining departmental strategy and package development roadmap to achieve business success and technology leadership
