CY8CKIT-062S2-AI PSoC™ 6 AI Evaluation Kit release notes

About this document

Scope and purpose

Thank you for your interest in the CY8CKIT-062S2-AI PSoC™ 6 AI Evaluation Kit. This document lists kit contents, installation requirements, kit documentation, and limitations.

Table of contents

1 Release contents

1.1 Kit contents

The CY8CKIT-062S2-AI PSoC™ 6 AI Evaluation Kit includes the following:

- PSoC™ 6 AI Evaluation Board
- Inlay card (a printed QR code points to the getting started webpage)

2 Tool information

2.1 Software and tools

Code examples for this kit require ModusToolbox™ software version 3.1 or later. This is available on the ModusToolbox™ software webpage. Refer to the kit guide for details.

Creating Machine Learning Models with this kit requires Imagimob Studio software version 4.4 or later. This is available on the Imagimob Studio webpage. Refer to the kit guide for details.

KitProg3 firmware v2.50 or later is required to program the PSoC™ 62 device on the kit. The ModusToolbox™ installer automatically installs KitProg3 drivers.

2.2 Code examples and kit collateral

The kit webpage includes the documents and hardware files. The code examples are available on the Infineon GitHub repository.

2.3 Installation

All required software installation instructions are provided in the kit guide, which is available on the kit webpage.

2.4 Kit revision

This is the initial revision (Rev. **).

2.5 Known issues and limitations

Engineering samples have a silk marking issue when swapping UART TX and RX. This may cause confusion and misconnection.

Workaround: Refer to the board schematic and connect the pins as follows:

- External UART TX to the device's RX
- External UART RX to the device's TX

Resolution: The issue is fixed in the production version.

2.6 Documentation

The following kit documents are available on the kit webpage.

- CY8CKIT-062S2-AI PSoC™ 6 AI Evaluation Kit guide
- CY8CKIT-062S2-AI PSoC™ 6 AI Evaluation Kit release notes

2.7 Technical support

For assistance, go to Infineon support. Visit the Infineon community to ask your questions in the Infineon developer community.

2.8 Additional information

- For more information about the PSoC™ 62 MCU and its associated documentation and software, visit the PSoC™ 62 series webpage

2 Tool information

- For more information about the ModusToolbox™ software functionality and releases, visit the ModusToolbox™ software webpage
- For a list of trainings on ModusToolbox™ software, visit the ModusToolbox™ Software Training webpage
- For more information about the Imagimob Studio software functionality and releases, visit the Imagimob Studio webpage

Important notice

The information contained in this application note is given as a hint for the implementation of the product only and shall in no event be regarded as a description or warranty of a certain functionality, condition or quality of the product. Before implementation of the product, the recipient of this application note must verify any function and other technical information given herein in the real application. Infineon Technologies hereby disclaims any and all warranties and liabilities of any kind (including without limitation warranties of non-infringement of intellectual property rights of any third party) with respect to any and all information given in this application note.

The data contained in this document is exclusively intended for technically trained staff. It is the responsibility of customer's technical departments to evaluate the suitability of the product for the intended application and the completeness of the product information given in this document with respect to such application.

Warnings

Due to technical requirements products may contain dangerous substances. For information on the types in question please contact your nearest Infineon Technologies office.

Except as otherwise explicitly approved by Infineon Technologies in a written document signed by authorized representatives of Infineon Technologies, Infineon Technologies' products may not be used in any applications where a failure of the product or any consequences of the use thereof can reasonably be expected to result in personal injury.
