

# How can I get access to MyICP?

# Step 1: Register on our website

In order to access MyICP, you need to sign up on our official website:

1. Go to <https://www.infineon.com/microcontroller/#register> and register yourself

2. Type in the necessary information in the registration form

3. Activate your account by clicking on the link in the e-mail sent to you

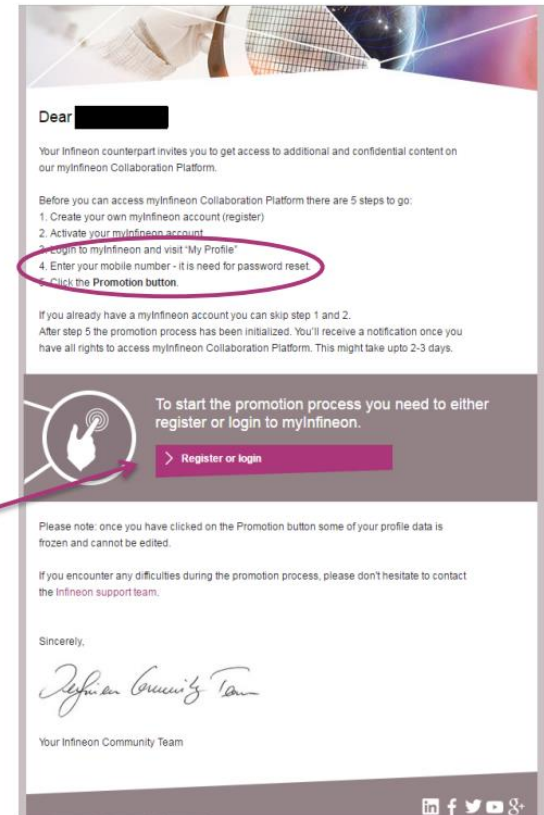

**Note:** You have to register with your *company/university email address*. We cannot give your private email address access to the material.

The image displays two screenshots of the Infineon registration process. The first screenshot, labeled '1', shows the 'myInfineon registration' page. It features a header with the Infineon logo and the text 'Register now and enjoy the benefits of myinfineon'. Below this are three icons representing 'Valuable Content', 'Integrated Services', and 'Personalized Experience'. The main form includes an 'E-mail' field with a red error message 'Please enter a valid e-mail address.', a 'Country / Territory' dropdown menu set to 'Germany', and a 'Password' field. The second screenshot, labeled '2', shows the 'myinfineon registration' page with a close button in the top right corner. It contains a 'Register for myInfineon' section, a 'Login' link, and a 'Submit' button. Below the form, there is a note: 'All fields marked with an asterisk (\*) are mandatory.' and a link to the 'Privacy Policy'.

# Step 2: Become a Promoted User!

Registering as a user is not enough - you need to be a **promoted user** in Infineon's network to access MyICP. How can you do that?

1. Send an e-mail to ***microcontrollers@infineon.com*** and request access to the AURIX Customer Documentation
2. In response, you will receive an e-mail from us with further ***instructions*** (Check your Junk email too)
3. Please click the button: ***'Register or login'*** in the e-mail. In case you do not receive the e-mail or the button is not working, please log in to your account at our web site: [www.infineon.com](http://www.infineon.com)
4. Please ***follow the steps*** in order to finish the promotion process of your account.

# Step 3: Get Access to the Required Documentation!

- > This step is only possible after Step 2, i.e. after your account has been successfully promoted. It requires you to wait till you get an email from us.
- > The email you receive from us will confirm your access to the required documentation and give you the link to access MyICP

If you want access to confidential information, please go to the **next slide** which has details regarding the Non Disclosure Agreement.

# The NDA Process

---

## What is an NDA?

- An **NDA** or **Non-disclosure Agreement** is a contract you sign with Infineon to officially accept the confidentiality of information made available to you. It includes:
  - The names of the parties to the agreement
  - The time period of the agreement
  - What constitutes confidential information
  - Appropriate uses of the information to be revealed
  - Other provisions

## When do I need an NDA?

- An NDA is required for getting access to the following documentations:
  - AURIX™ TC3xx documentation
  - HSM documentation (all)
  - AURIX™ TC4xx documentation
  - Traveo™ Documentation
  - PSoC® Documentation

## Step 4: How can I sign an NDA if I do not have one?

---

- If your company does not have a NDA with Infineon and you are interested in signing it with us, please add the following information in your **email**:
  - Exact company name (incl. legal form)
  - Contact person (Full name)
  - Contact Email Address
  - Contact Phone Number
  - Company Address (with postal code)
  
- If your company is a **Chinese company**, please add the following information in your email:
  - Company Name (In English)
  - *Company Name (In Chinese)*
  - *Company Reg. No*
  - Company Address (with postal code)
  - Company Profile

Once we receive the email with complete details regarding your company, we will forward your request to our legal team and get back to you as soon as the process is finished.

# AURIX™, TRAVEO™ & PSoC® Forum

## AURIX™ Forum:

For all questions that cannot be solved with the documents you have access to, you can always post your questions in our Tricore Forum, where our engineers will be happy to help:
