

PD-91551E

Power MOSFET
Surface Mount (SMD-1)
400V, 14A, N-channel, HEXFET™ MOSFET Technology

### **Features**

- Simple drive requirements
- Hermetically sealed
- Electrically isolated
- Surface mount
- Dynamic dv/dt rating
- Light weight

### **Potential Applications**

- DC-DC converter
- Motor drives

### **Product Summary**

BV<sub>DSS</sub>: 400V

• I<sub>D</sub>: 14A

•  $R_{DS(on),max}$ : 315m $\Omega$ 

• **Q**<sub>G, max</sub>: 110nC

• **REF:** MIL-PRF-19500/592

### **Product Validation**

Qualified to JANTXV screening flow according to MIL-PRF-19500 for high-reliability applications

### **Description**

IR HiRel HEXFET™ technology is advanced line of power MOSFET transistors. The efficient geometry design achieves very low on-state resistance combined with high transconductance. HEXFET™ transistors also feature all of the well-established advantages of MOSFETs, such as voltage control, fast switching and electrical parameter temperature stability. They are well-suited for applications such as switching power supplies, motor controls, inverters, high energy pulse circuits, and virtually any application where high reliability is required. The HEXFET™ transistor's totally isolated package eliminates the need for additional isolating material between the device and the heatsink. This improves thermal efficiency and reduces drain capacitance.
