

RAM Memory Products Longevity Program

Over four decades of memory leadership

www.infineon.com/memory

RAM Memory Products Longevity Program

The Infineon RAM Memory Products Longevity Program secures the supply and availability of Marketing Part Numbers (MPNs) with a compatible set of core features and supports RAM products for a minimum of 10 years. The core features include command set, mechanical package and pin-out, density, voltage range, and temperature range. This program reinforces Infineon's reputation as a trusted supplier committed to protecting the investment made by customers serving mission-critical applications, including industrial, medical and automotive market segments that require extended product availability and support for high-performance RAM memories.

The RAM Memory Products Longevity Program products include asynchronous SRAMs, serial ferroelectric RAMs or F-RAMs, parallel nonvolatile SRAMs or nvSRAMs, HyperBus™ interface-enabled serial HyperRAM™ memories, as well as the RAM memories sold into aerospace, military and defense markets.

The Infineon RAM Memory Products Longevity Program will be revised periodically to add new products. The Longevity Program described here is not an indication of End-of-Life. Please refer to the RAM Memory product roadmap for the latest product status.

If we decide to discontinue any MPN on this list due to circumstances beyond our control, we will notify customers through a Product Termination Notice with sufficient lead-time and a replacement part in accordance with Industry Standard JESD.

Please contact your local sales representative for information on ordering part numbers that have not been included in the Products Longevity Program.
